BusPlanner Pro

plan
analyze
optimize

BusPlanner® *Pro* is route planning software that helps transportation departments provide flexible, efficient routing solutions. Its intuitive, easy-to-use interface enables your staff to easily access vital information, plan your bus routes, and manage all aspects of your transportation solution. Using BusPlanner® *Pro*'s innovative tools, you can accomplish more with less.

BusPlanner® *Pro* delivers:

- Time-saving automated processes
- Powerful optimization tools
- Dependable multi-user access
- Flexible cloud-based (or self-hosted) technology
- Scalable routing for any school district

Better Routing Solutions ›

Create efficient routing solutions using our powerful route creation, editing, and optimization tools. More efficient routes provide better service and save you money!

Reduce Your Workload ›

Use BusPlanner® *Pro*'s flexible productivity tools for common daily tasks such as creating reports, finding stops, managing runs, and adding students. Answers are provided immediately and duplication is eliminated, while you save time and reduce your workload.

Offer More Information ›

BusPlanner® *Pro*'s powerful analysis toolkit offers distance and time calculations, costing breakdowns, statistics, export possibilities and substantial reporting functions. Better decisions are made because full planning data is available.

Save Time and Money ›

BusPlanner® *Pro*'s optimization tools maximize efficiency by reworking transportation scenarios, offering alternative run and routing solutions. Evaluating alternative options allow staff to take full advantage of available resources to ultimately save time and money.

How Does It Work?

BusPlanner® *Pro* is a Windows based management system that allows one or more staff to access a shared transportation database. In combination with **BusPlanner® *Info*** – our API application – you can easily set up two-way integration with your Student Information System on an automated, scheduled basis.

Additional products, such as **BusPlanner® *Web*** – our web-based Pupil Transportation Information product – can be added to provide further automation and cost-saving features.
