

Comprehensive & Powerful School Fleet Management Tools

BusPlanner Fleet integrates with your BusPlanner routing system to give you granular control & insights for all your buses.

With the help of extensive reports generated using crucial KPIs, BusPlanner Fleet is the one-stop-solution to improve operational efficiency at your school district.

Fleet Maintenance

- Reduce the risk of unexpected mechanical failures with timely maintenance reminders & diagnostics.
- Track the parts you need with advanced inventory management tools.
- Stay within budget by tracking costs with powerful data-driven reports.

Fuel Management System

- Keep track of all fueling needs from one location without any third-party applications.
- Choose from several fuel locations & mobile trucks based on your needs.

KPI Tracking

- Keep tabs on costs for each job with breakdowns for labor & parts for each vehicle.
- Monitor staff performance & reward outstanding performers.

Even though we're short of **30 bus drivers**, the tools within BusPlanner help optimize our operations so we don't fail.

St. John's School District, FL

BusPlanner Fleet is your one-stop-shop for your fleet management needs.
